Full Change Log for Version 10

Release 10.3.0 – Coming Soon

Enhancements

- *Improved annotation export organization and structure for .txt and XML outputs*
- *Header & Footer page numbering now starts at “1” instead of “0”*

Bugs

- *Grouped Annotations not being exported*
- *(Mac) Crisp text highlights on the Mac when PDF Studio is installed using the 64-bit Mac installer*
- *(Document Specific) Fail to display text on some text fields containing default value*
- *Unable to edit combo box option once the option was selected in the field*
- *Password fields displayed as empty instead of displaying dots (i.e.)*
- *Misspelled date preview in form field formatting properties*
- *Internal bug fixes*

Release 10.2.0 – September 22 2015

Enhancements

- *Updated and Improved online user guide. Go to Help->PDF Studio Help or <http://www.qoppa.com/files/pdfstudio/guide> to access the new guide.*

Bugs

- ☐ *Windows 10: Default PDF Association Reverts to Microsoft Edge*
- ☐ *How to Export PDF Form Field Data Into an Excel Spreadsheet*
- ☐ *Validating required fields when submitting an interactive PDF form*

Popular Entries

- ☐ *How to resolve Java SE 6 runtime message on Mac OSX 10.10 Yosemite & 10.11 El Capitan*
- ☐ *Bad Reviews about Wondershare / Iskysoft / Aimersoft*
- ☐ *How to delete page numbers in a PDF document*
- ☐ *What's in PDF Studio Version 9*
- ☐ *Student, education and non-profit discount*
- ☐ *What's new in PDF Studio 10?*
- ☐ *Affordable PDF Editor Adobe Acrobat Alternative for Mac OS X*

- *Clipping issues when moving flattened text annotations*
- *Issue with select all and zoom (select all function only selected a portion of the text)*
- *Issue handling special font character during PDF/A Conversion*
- *Fixed issue with rotating stamps that have transparency*
- *(Mac) Document properties dialog broken when using drag and drop to open document*
- *(Mac) Printing 1 bit per pixel images failed to print*
- *(Mac) Issue when printing some images using CCITT image compression (Pages would print blank)*
- *OCR: Improvements to better handle different image types*
- *Issue with Save As when running from command line (dialog would not display)*
- *(Unix) Issue with save on Solaris when running from command line ("Error renaming temp file at /var/tmp/pdf*.filename..tmp")*
- *Internal fixes*

Release 10.1.0 – June 29 2015

Enhancements

- *Regression: Reverted to previous behavior when dragging thumbnails across documents to copy pages. To move pages instead of deleting them, now use Ctrl + drag. [Read more about moving or copying pages using the thumbnail pane.](#)*
- *(Linux) [Linux users can digitally sign PDFs using USB Smart Card Hardware PKCS11](#)*
- *Batch Preflight: Add PDF/A-1b Validation Profile*

Bugs

- *Text to PDF spinners do not update while changing units when not in English*
- *Form fields randomly resizing*

- ☐ *Insufficient data for an image in latest version of Adobe Reader*
- ☐ *PDF Studio Coupons, Special Offers, Discount Codes, Deals*
- ☐ *PDF Studio 10 Change Log*

Select Category

- *[Windows] Non-Modal dialog causes frames to flash when opening multiple files*
- *Remove link action immediately when linked page is deleted*
- *Don't flatten redaction annotations*
- *Rotation handle should not show when multiple stamps are selected*
- *Rasterize Dialog: Start JPEG Quality at 1 instead of 0*
- *Compare feature displays an error loading file when opening a Word doc or any other supported format*
- *Linux GTK Look & Feel: ClassCastException in spinner*
- *Text Selection – Ctrl+A broken in some documents*
- *NullPointerException when importing callout annotations*
- *Batch Preflight rewriting files when not needed*
- *Changing tab order in field pane is broken*
- *Preview issue with stamps that are both transparent & rotated*
- *(Document Specific) Some text highlight would highlight return characters*
- *(Document Specific) Fail to open a document containing JPEG 2000 compression*
- *[Ubuntu 15.04] "Buy Now" does not work*
- *Scanning Dialog: Color Format Label Issues*
- *Missing message internationalization when overwriting a profile for Header / Footer or Watermark*
- *Missing label international in FileAttach properties dialog and Redaction Properties Dialog*
- *OCR Dialog: DPI Resolution Label Issue (MissingResourceException)*
- *Scan Insert Dialog: Missing label internationalization*
- *Optimizer Dialog: Label typo in Optimizer default profile "Agressive" should be changed to "Aggressive"*

Release 10.0.1 – May 12 2015

Fixes and Minor Improvements:

- *Exporting comments with invalid or illegal character as XFDF is now handled better*
- *(Mac) Display issue with Overlay Comparison on Retina Displays*
- *Copy and Pasting Radio Button now preserves the border*
- *Rubber stamps were not using author name defined under tool preferences*
- *Typewriter would not work when not in Sticky mode*
- *Cursor issue introduced with new date picker component: not able to clear or type date field sometimes*
- *Flattening a redaction annotation would cause an error on the page*
- *Optimizer not recognizing some Black & White images (B/W images processes as if they were Gray images)*
- *Optimizer not handling images contained in FormXObjects*
- *Improved memory usage on Mac OS X in OCR or when rasterizing a large document (java heap space error)*
- *Mouse scroll zoom not responding sometimes*
- *(Windows) Twain scanning was broken on Windows (WIA scanning was always used)*
- *Flashing / flickering issue when double-clicking to open documents sometimes*
- *Issue with multi-annotations editing for typewriters, where note content was updated when it should not*
- *Issue with setting Text to PDF preferences when running in other languages than English*
- *Internal fixes*

Original Release 10.0.0 – March 31 2015
