# Panel Overview

## Get, load and remove FX Tools

- 1 Load FX Tool into the panel
- 2 Remove FX Tool from the panel
- 3 Refresh the panel
- 4 License and uninstall the panel
- 5 Get more FX Tools and effects from Orange\_Box

# Install the FX Box panel in Photoshop CC-2014 and newer

Please watch this short install video:

<https://youtu.be/cSEUmQdTdSU>

## Install the panel – Photoshop CC-2014 + newer

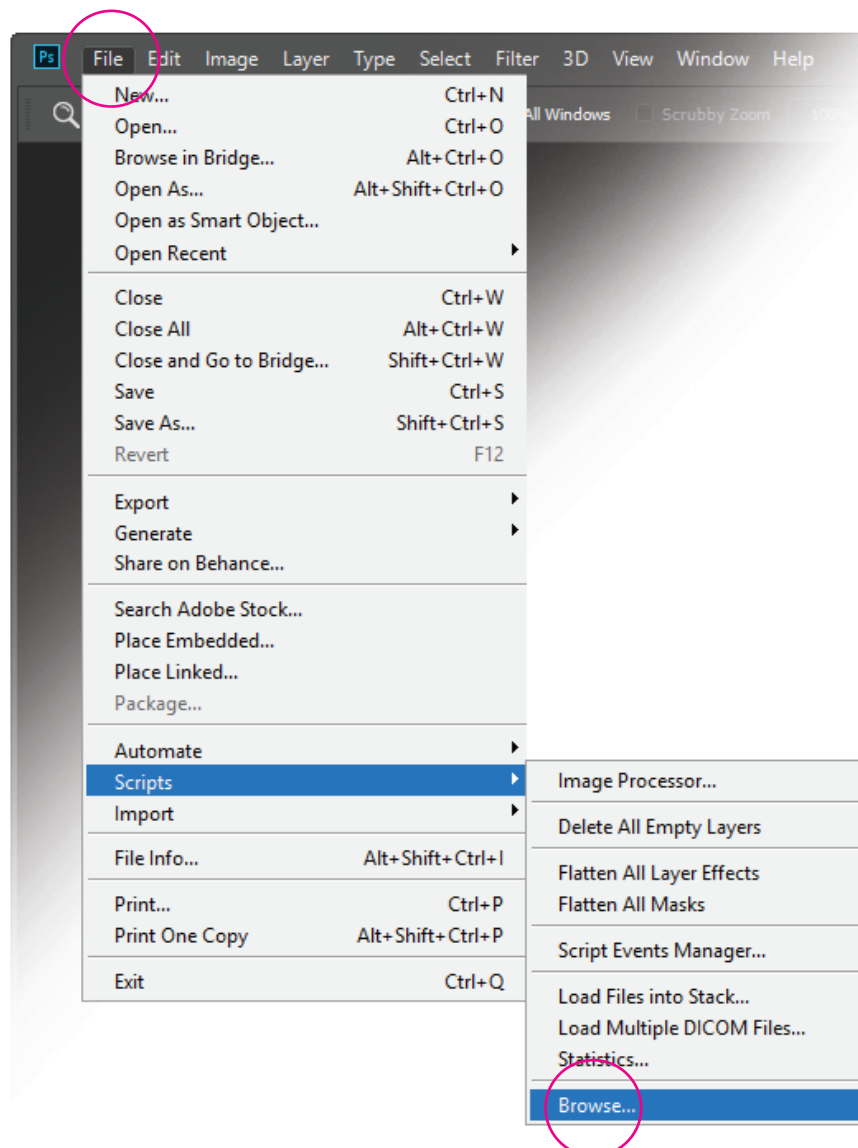

### IMPORTANT:

**Do not modify the content of the fx\_box folder!**

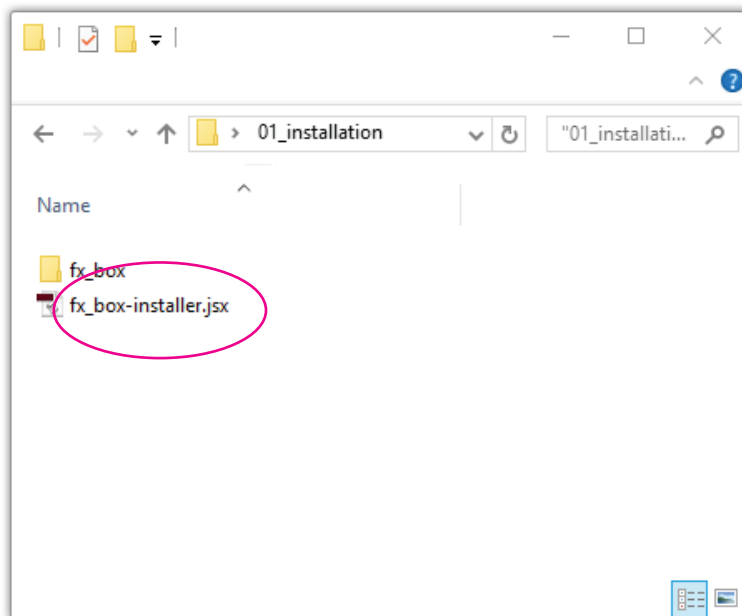

If you modify the content of the folder, the plugin will no longer work. Then you have to download it again.

1. Open Photoshop, go to File > Scripts > Browse...

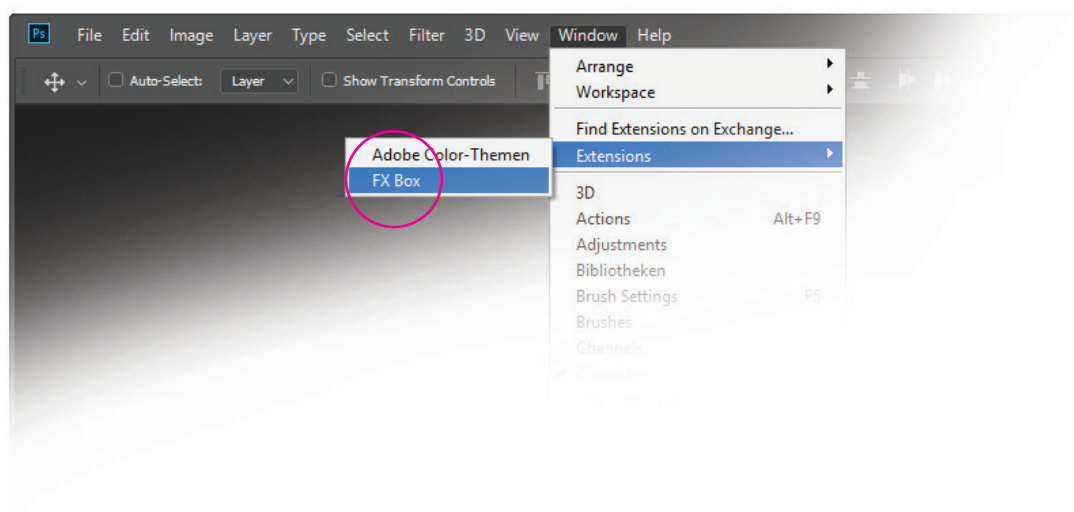

2. Browse to the unzipped 01\_installation folder and select the Fx\_box-installer.jsx

3. Follow the instruction
4. Restart Photoshop
5. Browse to Window > Extensions > FX Box

## Support and troubleshooting

OS	CC Version	Issue	Solution
Mac	CC-2018	The very first time when the panel is collapsed or reopened, it will assume forever a completely wrong width and/or height and hide relevant content.	For this Photoshop bug there is no solution at this time.
Mac	CC-2018	If an FX Tool is loaded by using the "+" button, a blank window will appear that hides and freezes Photoshop.	Please restart your Mac and Photoshop. Load the FX Tool in the same way you install the FX Box: <ul style="list-style-type: none"><li>- Go to File &gt; Scripts &gt; Browse ...</li><li>- open the "...installer.jsx"</li><li>- Click the "refresh" button in the FX Box panel</li></ul>

## Support and troubleshooting

Of course we will support you with the installation and usage of the plugin. Just write us an e-mail by using the contact form on our website.

But before you send your message, please read the instructions and watch the tutorials. It's much faster than waiting for a reply. We spend a lot of time to describe all steps very well.

### Didn't you find the answer?

Then please use the e-mail form at our website to contact us.

If you are reporting an issue:

- give us as much information as possible  
(Photoshop Version number, OS version)
- tell us what exactly you have done
- screenshots are helpful
- videos are very helpful. Try this free app: <http://recordit.co/>
